

BUSTER + PUNCH

SUSTAINABILITY - ECO FRIENDLY SUGAR CANE PACKAGING

Buster + Punch's **HARDWARE** packaging made from sugar cane, making it fully recyclable.

Sugar cane packaging is made from the leftover 'waste' from sugar cane extraction.

From sugar cane waste, a polymer is made which is bio' based as opposed to 'oil' based.*

While sugar cane grows, it is using carbon dioxide available in the atmosphere, therefore offsetting additional energy used in the packaging production process.
