

Designer Doorware has proudly implemented business strategies to continuously thrive as a sustainable and eco-friendly company.

As a progressive business, Designer Doorware recognises its responsibility for environmental protection for current and future generations on both a local and global level. All showrooms, offices and warehouse facilities operate in a manner that strives to protect the human environment, staff, clients and all visitor's health. The environmental framework has been developed for setting and reviewing environmental goals that have continued to develop alongside the business.

The following principles have been developed and implemented to further support Designer Doorware's Environmental Policy.

- Ensure the correct and safe disposal of all substances.
- Conserve water resources and minimise wastewater disposal.
- Minimise waste generation through reduction, reuse and recycling.
- Minimise, and where possible, eliminate the use of harmful substances.
- Minimise pollution – noise, visual, electromagnetic radiation and odour.
- Address environmental concerns in all planning and landscaping decisions.
- Encourage teaching and research activities designed to facilitate and implement the policy.
- Encourage procurement procedures that adhere to the principles of the environmental policy.
- Conserve energy (produced by non-renewable resources, and by methods which pollute the environment).
